Work Samples

Flash/ActionScript 2.0, Flash Media Server, XML

Multimedia Player
(Visual Design and Development)

Model-View-Controller design pattern. This modular player streams flv video and mp3 from a Flash Media Server, handles server license limitations by automatically switching to progressive download and offers virtually limitless possibilities for extensibility and adaptation to suit the client's needs. The same Model-View-Controller pattern was applied to the development of the Blogs column to the right of the player.

Flash/ActionScript 2.0, XML, PHP, MySQL

Reporter's Blog, Photo and Video Gallery, Poll *
(Visual Design and Development)

Observer Design Pattern. Multiple XML files provide content for customizable template and Send-to-a-friend feature provided a viral marketing tool for the event. PHP/MySQL random poll on each section.

*due to the nature of the event, the live site is no longer available

Flash Animation/ActionScript 2.0, Progressive Video
